EXERCISE – 9

Question: Execute and display the results of the following Nmap Timing and Performance commands in Kali Linux Operating System:

1. Polite IDS evasion
2. Normal IDS evasion

Aim

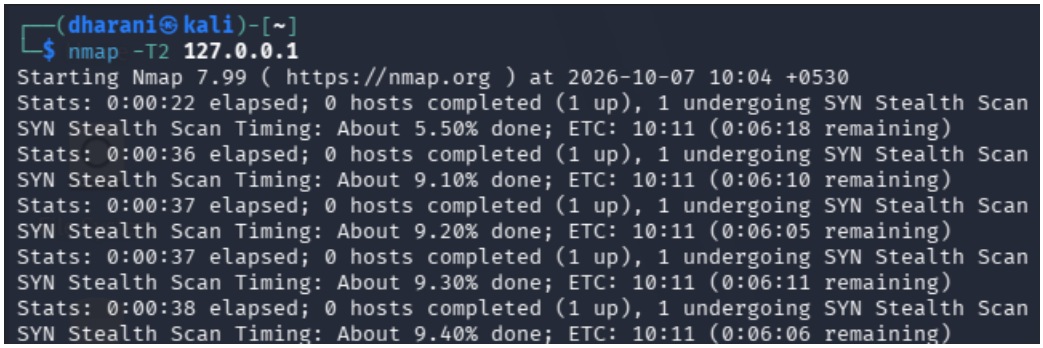

To execute and display the Nmap timing and performance commands for IDS evasion in Kali Linux.

1. POLITE IDS EVASION

Command:

nmap -T2 127.0.0.1

Use: The -T2 option performs a slower and more polite scan.

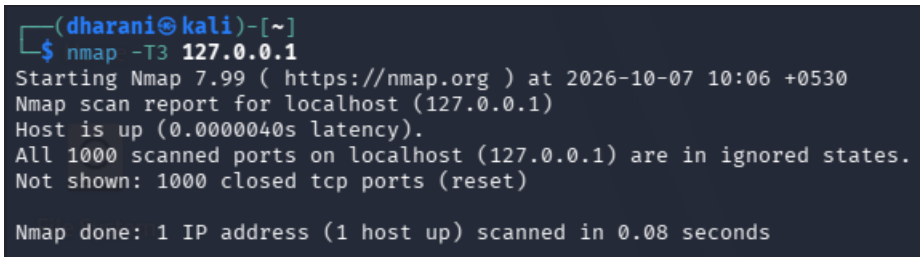

2. NORMAL IDS EVASION

Command:

nmap -T0 127.0.0.1

Use: The -T0 option performs a very slow scan.

Result

Thus, the Nmap timing and performance commands for polite and normal IDS evasion were successfully executed in Kali Linux, and the results were displayed.
